

Robert Reimann

Leading IT-guy

About me in 20 seconds

I am a proactive and empathetic developer, who has a strong passion for teamwork, effective communication and creative problem-solving. I started as a programmer at the age of 12, and since then I have developed a strong background in full-stack development. With my positive attitude towards life, and constant wish for self-improvement, I can perfectly listen to people and have meaningful conversations, creating strong connections while inspiring the team.
